SUMMARY

BI leader with 10+ years of experience turning complex data into revenue-driving decisions. Currently lead a team of three engineers building the analytics infrastructure behind pricing and revenue optimization for e-commerce clients at Gierd. Deep expertise across SQL, Python, BigQuery, dbt, and Snowflake, paired with a track record of building and scaling BI tooling (Metabase, Looker, Power BI, Tableau). Pioneering the use of AI agents to automate BI workflows — saving teams an estimated 50–60 hours per week. Proven ability to lead cross-functional teams and communicate complex analysis to stakeholders at every level.

EXPERIENCE

Lead Business Intelligence Engineer

Nov 2025 – Present

Gierd — Sandpoint, ID

- Lead a team of three BI/data engineers, setting technical direction and quality standards for pricing and revenue-optimization analytics serving e-commerce clients.
- Own the BI platform stack centered on Metabase — with hands-on experience across Looker, Power BI, and Tableau — architecting scalable SQL data models across BigQuery and dbt.
- Build and deploy Claude Code agents and custom Skills to automate BI workflows, saving teams an estimated 50–60 hours per week and counting.
- Partner with cross-functional stakeholders to translate business questions into KPI-driven reporting and pricing recommendations.

Data Analyst

Aug 2025 – Nov 2025

Gierd — Sandpoint, ID

- Conducted data analysis to identify pricing trends, patterns, and market anomalies driving revenue-optimization strategies for e-commerce clients.
- Built compelling data visualizations in Tableau to communicate findings to technical and non-technical stakeholders.
- Performed advanced SQL analysis across large, multi-source datasets to support pricing-optimization initiatives.

Analytics Engineer

Jun 2024 – Aug 2025

John Burns Research and Consulting — Hayden, ID

- Designed and deployed LLM agent pipelines and AI automation solutions (LangChain, LlamaIndex, Azure AI Studio), partnering with business units to identify and implement AI-driven process improvements.
- Evaluated AI vendor tools and led proof-of-concept efforts, aligning solutions with business requirements and integrating them into existing workflows.
- Conducted pricing trend and market anomaly analysis using advanced SQL to support revenue-optimization strategies for real estate clients.
- Delivered data visualizations and pricing recommendations to technical and non-technical stakeholders.

Manager, Data R&D

Feb 2023 – Jun 2024

John Burns Research and Consulting — Hayden, ID

- Led comprehensive analysis of real estate performance and market fundamentals, creating data visualizations and insights that informed strategic investment decisions for institutional clients.
- Managed and mentored a data analyst, providing ongoing performance feedback and technical guidance to support career growth.
- Collaborated with internal teams and client stakeholders to assess research utilization and identify optimization opportunities, driving continuous improvement in data products and methodologies.
- Synthesized complex datasets from multiple sources — including market data providers, government databases, and proprietary research — to create comprehensive market views.
- Developed predictive models and forecasting frameworks for key market indicators, enhancing the accuracy of market projections and strategic planning processes.

Manager, Decision Sciences

May 2022 – Feb 2023

UM Worldwide — Hayden, ID

- Led data-driven marketing insights and recommendations for Fortune 500 clients, delivering presentations of campaign performance that drove continued client engagement and increased media investment.
- Managed a team of data analysts specializing in cross-channel campaign effectiveness measurement, providing strategic oversight for brand-level optimization opportunities.
- Collaborated with cross-functional teams — ad operations, engineering, and account management — to build innovative analytics solutions and maintain data governance standards.
- Partnered with technology and data vendors to evaluate and implement advanced measurement solutions.

Manager, Measurement and Insights

Mar 2021 – Apr 2022

Effectv — Spokane, WA

- Led marketplace analysis and audience insights for regional advertising initiatives, identifying target audience trends and viewership patterns that informed strategic media planning decisions.
- Managed a team responsible for audience segmentation and customer targeting, translating client requirements into actionable audience segments.
- Collaborated with Advertising Strategists to develop data-driven client presentations demonstrating audience reach and campaign effectiveness for major brand partnerships.

Senior Data Analyst

Aug 2015 – Mar 2021

Effectv — Sacramento, CA

- Analyzed large-scale qualitative and quantitative datasets using Looker, Strata, Kantar, Polk, and Comscore to support the company's product suite and drive data-informed sales strategies.
- Conducted comprehensive market research and competitive analysis to identify sales opportunities and support customer acquisition and retention efforts.
- Developed statistical reports and data visualizations presenting actionable recommendations to marketing and sales leadership.

E D U C A T I O N

Bachelor of Science, Economics — Oregon State University, Corvallis, OR
